

EXPANDING your *BlueWater* HORIZONS

*A Cruising Association **BlueWater** section talk and workshop*

'At Sea with Technology'

Saturday 18 February 2017 at 09.00 for 09.30

A set of talks on three important technologies for Bluewater cruisers. Automatic Identification System (AIS), High Frequency (HF/SSB) radio and Satellite Imagery based electronic charting. This will be followed by a workshop/tutorial demonstration showing how to create and use your own satellite imagery based electronic charts.

Mike Reynolds our presenter is an electronics engineer with a keen interest in navigation and communication systems to aid Bluewater cruising. He has developed many GE imagery libraries and shares these with fellow cruisers.

Programme

Registration 09.00

Automatic Identification Systems (AIS) 09.30 to 11.00

High Frequency (HF/SSB) Radio 11.00 to 12.30

A sandwich lunch is provided 12.30 to 14.00

Satellite Imagery based Electronic Charting 14.00 to 15.00

Tutorial/Workshop on Satellite Imagery based Charting 15.00 to 17.00

Please install 'Open CPN' onto your laptop for the workshop/tutorial

The cost is £17 for Cruising Association or OCC members and £20 for non members.

To book the event, please visit the CA website www.theca.org.uk or click [\[HERE\]](#)

The Cruising Association library will be open during the lunch period and after the talk.
