

# DRY-Mat® Anti-Condensation Underlay

The UK's No. 1 Solution for Condensation & Damp Under Mattresses

- ✓ Stops Condensation Build Up
- ✓ Restricts Damp, Mould & Mildew, Bacteria and Musty Odours
- ✓ Lasts a Lifetime – Doesn't Degrade, Fray or Lose Structure
- ✓ Quick & Easy to Fit – Takes just 5 Mins

All boat owners have experienced damp and condensation forming under their mattresses. It's one of the most common issues on board, and can ruin your mattresses, create bad smells and an unhygienic environment.

DRY-Mat underlay is the most effective solution, and takes just 5 minutes to fit, making it a real "must-have" product on all boats!

When we sleep, we perspire and some of this moisture travels through the mattress and turns to condensation on the wooden or fibreglass base below. As there is no air flow under the mattress, the moisture is trapped there which causes damp and musty smells to form as well as mould and bacteria to grow.

DRY-Mat is simply placed on the bed base, allowing air to flow under the mattress, preventing condensation, damp, mould, and mildew.

Constructed from thousands of tiny micro-springs, DRY-Mat will not compress, doesn't degrade and last's a lifetime!

Available in 4 sizes, DRY-Mat can be cut to the exact shape and size with scissors and doesn't require any fixing in place so it can be fitted in no time at all!
